B26 | The system shall allow users to select a payment method (Credit Card, Cash on Delivery, etc.).

	A	B
1	**Req_Id**	**Requirement Description**
2		**User & Authentication Requirements**
3	Req_01	The system shall allow users to register using email and password.
4	Req_02	The system shall allow users to log in using valid credentials.
5	Req_03	The system shall allow users to reset the password via email verification.
6	Req_04	The system shall allow users to update their profile details (name, DOB, address, etc.).
7	Req_05	The system shall display user order history after login.
8		
9		**Product Browsing & Search Requirements**
10	Req_06	The system shall allow users to search products by name or keyword.
11	Req_07	The system shall allow users to filter products by categories (electronics, apparel, etc.).
12	Req_08	The system shall allow users to sort products by price, popularity, rating, and relevance.
13	Req_09	The system shall display product details including name, price, images, description, and reviews.
14	Req_10	The system shall allow users to view related products on the product details page.
15		
16		**Shopping Cart & Wishlist Requirements**
17	Req_11	The system shall allow users to add products to the shopping cart.
18	Req_12	The system shall allow users to update product quantities in the cart.
19	Req_13	The system shall allow users to remove items from the cart.

Requirement | Test Scenario | Test Case

Ready | Accessibility: Good to go

C4: Verify user can login successfully using valid registered credentials.

Test Scenario ID	Module Name	Test scenario Name	Priority	Type of Scenario
TS_01.Req_01	User & Authentication Requirements	Verify user can successfully register using valid email and valid password.	High	Positive
TS_02.Req_01	User & Authentication Requirements	Verify registration fails when user enters invalid email format or weak password.	High	Negative
TS_03.Req_02	User & Authentication Requirements	Verify user can login successfully using valid registered credentials.	High	Positive
TS_04.Req_02	User & Authentication Requirements	Verify login fails when incorrect username or password is entered.	High	Negative
TS_05.Req_03	User & Authentication Requirements	Verify user can reset password using valid registered email and verification link/OTP.	High	Positive
TS_06.Req_03	User & Authentication Requirements	Verify password reset fails when using invalid or unregistered email.	High	Negative
TS_07.Req_04	User & Authentication Requirements	Verify user can update profile details with valid inputs.	High	Positive
TS_08.Req_04	User & Authentication Requirements	Verify system displays validation errors for invalid inputs (future DOB, blank mandatory fields).	High	Negative
TS_09.Req_05	User & Authentication Requirements	Verify logged-in users can view accurate order history.	High	Positive
TS_10.Req_05	User & Authentication Requirements	Verify system shows "no order history" or error when user has no orders or service fails.	High	Negative
TS_11.Req_06	Product Browsing & Search Requirements	Verify user can search and retrieve correct products using valid keywords.	High	Positive
TS_12.Req_06	Product Browsing & Search Requirements	Verify system shows "no results found" when invalid or empty keywords are used.	High	Negative
TS_13.Req_07	Product Browsing & Search Requirements	Verify system filters and displays products according to selected category.	High	Positive
TS_14.Req_07	Product Browsing & Search Requirements	Verify system displays an error or empty result when category filter is broken or unavailable.	High	Negative
TS_15.Req_08	Product Browsing & Search Requirements	Verify products are sorted correctly when sorting options are applied.	High	Positive
TS_16.Req_08	Product Browsing & Search Requirements	Verify sorting does not work or gives incorrect results when sort service is unavailable.	High	Negative
TS_17.Req_09	Product Browsing & Search Requirements	Verify complete product details load correctly on product details page.	High	Positive
TS_18.Req_09	Product Browsing & Search Requirements	Verify product details fail to load when product information API is down.	High	Negative
TS_19.Req_10	Product Browsing & Search Requirements	Verify related products are displayed based on the selected product.	High	Positive
TS_20.Req_10	Product Browsing & Search Requirements	Verify no related products load if recommendation service fails.	High	Negative
TS_21.Req_11	Shopping Cart & Wishlist Requirements	Verify user can add an item to the cart successfully.	High	Positive
TS_22.Req_11	Shopping Cart & Wishlist Requirements	Verify system prevents adding out-of-stock products to cart.	High	Negative
TS_23.Req_12	Shopping Cart & Wishlist Requirements	Verify user can increase or decrease product quantity in the cart.	High	Positive
TS_24.Req_12	Shopping Cart & Wishlist Requirements	Verify system prevents updating quantity beyond available stock.	High	Negative
TS_25.Req_13	Shopping Cart & Wishlist Requirements	Verify user can remove items from the cart successfully.	High	Positive
TS_26.Req_13	Shopping Cart & Wishlist Requirements	Verify system shows error when remove action fails.	High	Negative
TS_27.Req_14	Shopping Cart & Wishlist Requirements	Verify cart summary displays correct price, taxes, and total amount.	High	Positive
TS_28.Req_14	Shopping Cart & Wishlist Requirements	Verify cart summary displays incorrect values when pricing service fails.	High	Negative
TS_29.Req_15	Shopping Cart & Wishlist Requirements	Verify user can add products to wishlist successfully.	High	Positive
TS_30.Req_15	Shopping Cart & Wishlist Requirements	Verify wishlist addition fails when item is not available or service is down.	High	Negative

Requirement | Test Scenario | Test Case

Test case ID	Module Name	Pre-requisite	Test Case Name	Test Data	Test Steps	Expected Result	Actual Result	Status
TC_01.TS_01.Req_01	User & Authentication Requirements	User should have Chrome Browser and Developer should give a Testing URL to testers and testers should have a valid email and password	Verify user can successfully register using valid email and valid password.	https://demo.nopcommerce.com/ Valid email:123@gmail.com Correct Password:22446	1. User should launch the browser 2. User should enter the application URL 3. User should be able to see the home page 4.User should click on register button 5.user should enter a valid email and password 6.user should see registration is successful	1.Browser should be Launched successfully 2.Application URL should be launched successfully 3.home page should be visible 4.register details should be displayed to the user 5.Valid email and password should be	1.Browser is Launched successfully 2.Application URL is launched successfully 3.home page is visible 4.Register details is displayed to the user 5.Enter a valid email and password	1.pass 2.pass 3.pass 4.pass 5.pass
TC_02.TS_02.Req_02	User & Authentication Requirements	User should have Chrome Browser and Developer should give a Testing URL to testers and testers should have a invalid email and incorrectpassword	Verify user can successfully register using invalid email and in valid password.	https://demo.nopcommerce.com/ inValid email:1234@gmail.com inCorrect Password:22449	1. User should launch the browser 2. User should enter the application URL 3. User should be able to see the home page 4.User should click on register button 5.user should enter a invalid email and invalid password 6.user should not able to register	1.Browser should be Launched successfully 2.Application URL should be launched successfully 3.home page should be visible 4.register details should be displayed to the user 5.InValid email andinvalid password should be entered 6.Register should not be successful	1.Browser is Launched successfully 2.Application URL is launched successfully 3.home page is visible 4.Register details is displayed to the user 5.Enter a invalid email and invalid password 6.Register is not successful	1.pass 2.pass 3.pass 4.pass 5.pass 6.pass
TC_03.TS_03.Req_02	User & Authentication Requirements	User should have Chrome Browser and Developer should give a Testing URL to testers and testers should have a vaild username and valid password	Verify user can login successfully using valid credentials	https://demo.nopcommerce.com/ Valid username:SHILPA Valid passord Password:7788	1. User should launch the browser 2. User should enter the application URL 3. User should be able to see the home page 4.User should click on login button 5.user should enter a vaild username and Valid password 6.user should able to login	1.Browser should be Launched successfully 2.Application URL should be launched successfully 3.home page should be visible 4.login details should be displayed to the user 5.Valid username and valid password should be entered 6.login should be successful	1.Browser is Launched successfully 2.Application URL is launched successfully 3.home page is visible 4.Register details is displayed to the user 5.Enter a valid username and valid password 6.login is successful	1.pass 2.pass 3.pass 4.pass 5.pass 6.pass
TC_04.TS_04.Req_02	User & Authentication Requirements	User should have Chrome Browser and Developer should give a Testing URL to testers and testers should have a invaild username and invalid password	Verify user can't login successfully using invalid credentials	https://demo.nopcommerce.com/ invalid username:SHILPAk invalid passord Password:8788	1. User should launch the browser 2. User should enter the application URL 3. User should be able to see the home page 4.User should click on login button 5.user should enter a invaild username and inalid password 6.user should not able to login	1.Browser should be Launched successfully 2.Application URL should be launched successfully 3.home page should be visible 4.login details should be displayed to the user 5.Invalid username and invalid password should be entered 6.login should not be successful	1.Browser is Launched successfully 2.Application URL is launched successfully 3.home page is visible 4.Register details is displayed to the user 5.Enter a invalid username and invalid password 6.login is not successful	1.pass 2.pass 3.pass 4.pass 5.pass 6.pass
